Date: June 12, 2025

This document certifies that JOHN DEDES holds exclusive intellectual property, mining rights, and all derivative rights to the asteroid 99942 Apophis.

Core Data:

- Estimated Mass: ~65.9 billion kg
- Diameter: ~340 meters
- Estimated Composition: Mixed M-type (metallic, silicate, rare earth)

Projected Raw Ore Valuations:

1. Gold

- Concentration: 0.001%
- Quantity: ~659 metric tons
- Raw Value: ~\$46.1 billion USD

2. Nickel

- Concentration: 2.5%
- Quantity: ~1.65 million metric tons
- Raw Value: ~\$33 billion USD

3. Platinum Group Metals (PGMs)

- Concentration: 0.002%
- Quantity: ~1,318 metric tons
- Raw Value: ~\$43.5 billion USD

4. Rare Earth Elements (REEs)

- Concentration: 0.02%
- Quantity: ~13,180 metric tons
- Raw Value: ~\$2.64 billion USD

Refined and Industrial Use Value:

1. Gold (Refined and fabricated):

- Refined Value: ~\$75–800 billion USD

2. Nickel (Purified for aerospace/alloys):

- Refined Value: ~\$50–70 billion USD

3. PGMs (Fuel cells, precision instruments):

- Refined Value: ~\$90–180 billion USD

4. REEs (Magnets, lasers, space optics):

- Refined Value: ~\$15–45 billion USD

Estimated Total Value:

- Raw Total: \$125–540+ billion USD
- Refined and Fabricated Total: \$230 billion – \$1.1+ Trillion USD
- Strategic Long-Term Value (Space Infrastructure Use): Up to \$2–3 Trillion USD
